

Fly-In Programs

What? Fly-In Programs are made for minority or low-income students to visit colleges. These programs are all-expense paid trips that allow students to stay overnight for an all-inclusive college experience.

Why? Fly-In Programs allow students to make more educated decisions about the colleges they are applying to. You are able to speak with faculty and current students about their experience and the application process. Also, you can find out what type of school suits your learning style.
